Mohammed Alghifari

Full Stack Developer | Information Systems

m.khallaf03@gmail.com | +966558650008 | linkedin.com/in/mohammad-alghifari-a559b2324 | github.com/M7Ddev

PROFILE

Recent Information Systems graduate from King Abdulaziz University with hands-on experience in full-stack web development, Linux administration, and system design. Passionate about software engineering principles and building scalable solutions across web, mobile, and HPC environments.

EDUCATION

Bachelor of Information Systems | *King Abdulaziz University* 2021 – 2026

EXPERIENCE

Linux Administrator Intern | *CEHPC – King Abdulaziz University* Jun 2025 – Aug 2025

- Completed 8-week internship (240 hrs) covering Linux administration, Bash scripting, network configuration, virtualization, and cluster management on the Aziz Supercomputer.
- Built a mini cluster using Bash scripting as the capstone project.

PROJECTS

Sabba – AI Coffee Brewing Assistant | *Laravel, React, Google Gemini, PostgreSQL, Docker* [Completed]

- Full-stack solo project: an AI agent that generates precise coffee recipes, using server-side tools that own every numeric output — the LLM designs the approach but never calculates the numbers.
- Built a feedback and personalization loop, multimodal bag-label scanning, a bilingual (AR/EN) UI, and a 4-job CI pipeline with 121 automated tests.

KAU-ESPORTS | *Flutter, Firebase* [Completed – Graduation Project]

- Mobile app for organizing university esports tournaments; handles brackets, team registration, and match scheduling.

9oora | *Laravel, React, REST APIs* [Completed]

- ERP system for booking photo studio sessions for marketing companies; RESTful Laravel backend with React frontend.

pcWare | *React, Laravel, Public APIs* [Completed]

- Full-stack store dashboard with Laravel auth and a public API-powered PC parts search engine.

YourgymBro | *React, Supabase* [Completed]

- Gym tracking web app with workout history logging and a speech-to-text input feature.

Urdev | *PHP, MySQL* [Completed]

- E-commerce platform for IT solutions with full CRUD operations and MySQL database integration.

AutoVM | *Bash Scripting, Linux* [Completed]

- Bash script that automates virtual machine creation and server connection on Linux.

SKILLS

Programming & Frameworks: HTML, CSS, JavaScript, React.js, Node.js, PHP, Laravel, Dart, Flutter, Python, Java, Bash

Backend & Databases: REST APIs, MySQL, SQL, PostgreSQL, Supabase, Firebase, Oracle SQL, Django

DevOps & Systems: Linux Administration, Bash Scripting, Virtualization, Cluster Management, Network Configuration, Docker, Git, CI/CD (GitHub Actions)

Software Engineering: System Design, ER Diagrams, Database Design, Agile Methodologies, CRUD, API Integration, AI/LLM Integration (Gemini function calling & vision), Automated Testing (PHPUnit, Pint), Security Testing (OWASP Top 10)

Soft Skills: Problem Solving, Teamwork & Collaboration, Leadership, Time Management, Critical Thinking, Adaptability

COURSES & CERTIFICATIONS

- Full Stack Bootcamp – HashPlus (30 hrs)
- Frontend React Bootcamp – HashPlus (30 hrs)
- Backend Laravel Bootcamp – HashPlus (15 hrs)
- Flutter Bootcamp – HashPlus (30 hrs)
- UI/UX Bootcamp – HashPlus
- Python Django Track – Satr
- Web Application Development – Droob
- Full Stack Web Development – Udemy
- AI Agent Engineering Bootcamp – HashPlus
